PURPOSE

The purpose of the business plan for TAXM PUMPS SA DE CV is to provide a comprehensive overview of the company's products, services, and target markets, as well as its current operations, financials, and future objectives. The business plan aims to attract an investor or a group of investors who can provide the necessary funding to help the company achieve its goals, such as opening its own manufacturing and machine shop facilities and creating its own brand of products. Additionally, the business plan outlines the steps that the company plans to take to increase sales and expand its customer base, such as attending expos and conferences, implementing digital marketing campaigns, and establishing distributor relationships. Overall, the purpose of the business plan is to provide a roadmap for the company's growth and success in the oil, gas, and mining industries.

COVER LETTER

Dear Investor,

We are pleased to introduce our company, TAXM PUMPS SA DE CV, a leading supplier of chemical pumps, mud pumps, and flowline equipment to the oil, gas, and mining industries. Our company has been established since 1991 and our products are recognized by API, the American Petroleum Institute. We are proud to manufacture our equipment with API Monogrammed standards, ensuring that our products are of the highest quality and meet the required safety and reliability standards.

Our team consists of highly skilled veterans with decades of experience in the oil and mining industries. We have ambitious entrepreneurs, engineers, technicians, and managers with vast industry knowledge to assist in delivering the highest quality products with excellent lead times and delivery. We are committed to providing world-class products and services to meet all specified requirements for safety, reliability, and lead times.

We are looking for an investor to help us achieve our business objectives. We seek to open our own manufacturing and forges, have our own brand of products with no middle man, and have a machine shop in Mexico in our company-owned facility. Our target markets are the oilfield and mining industries in the USA, Mexico, and South America.

Our company has a level of experience in this industry of 35 years. We have generated for the past 5 years an average of half a million dollars but have lost sales of at least half a million due to lack of inventory. Since the first of this year, we have lost around 200,000 dollars in sales for the same reason. With our

investor(s), our goal is to manufacture and have local inventory to attend to our customers without lead times of 2 to 3 months.

We own some of our offices, and we pay \$1000 a month for rent for other offices in Texas and Mexico. Our monthly expenses include travel expenses, rent, phone, website, advertising, office supplies, and insurance. We plan to take steps to make our business a success, such as having distributors, launching our brand, and running heavy internet and social media campaigns.

We are confident that with your investment, we can achieve our business objectives and increase our revenue substantially. Thank you for your consideration, and we look forward to discussing our business further with you.

Sincerely,

John McLeroy

Business Manager

EXECUTIVE SUMMARY

TAXM Pumps SA de CV is a company that specializes in supplying chemical pumps, mud pumps, flowline equipment, and stainless-steel connections and tubing to the oil, gas, and mining industries. Our products are recognized by the American Petroleum Institute (API), and our manufacturing facilities have API-monogrammed equipment.

Our primary focus is offshore and onshore oil exploration and mining industries. We have a team of ambitious entrepreneurs and highly skilled veterans with decades of experience in the industry. Our team comprises engineers, technicians, and managers with vast industry knowledge, assisting in delivering the highest quality products with excellent lead times and delivery.

Our goal is to manufacture and engineer products to international and API standards and customer requirements, with a commitment to providing world-class products and services to meet all specified requirements for safety, reliability, and lead times. We are committed to customer satisfaction and strive for continuous improvement to attain excellence with our mission and vision.

TAXM Pumps SA de CV seeks an investment of \$500,000 to \$1,000,000 to open our own manufacturing and forges, have our own brand of products with no middle man to give our customers the best quality and price, and have a machine shop in Mexico in our company-owned facility.

Our target markets are the oilfield and mining industries in the USA, Mexico, and South America, where we have a level of experience of 35 years. Our pumps range from \$3,000 to \$250,000, and parts and equipment can range from \$2 to \$50,000.

In the first year of operation, we expect to generate revenue of at least \$1 million. We currently own some of our offices and pay \$1,000 a month for rent for other offices in Texas and Mexico. Our monthly expenses include travel, rent, phone, website, advertising, office supply, and insurance.

Our plan to make our business a success includes having distributors and heavy marketing campaigns through expos and conferences and social media platforms such as Google, Facebook, Instagram, Twitter, and Tik Tok. We believe that with the right investment, our company can grow and become a leader in the oil, gas, and mining industries.

TAXM PUMPS SA DE CV is a Mexican company that supplies chemical pumps, mud pumps, flowline equipment, valves, and parts for all types of equipment, original and aftermarket, stainless steel connections, and tubing to the oil, gas, and mining industry. We belong to the offshore and onshore oil exploration and mining industries, and our products are recognized by API (American Petroleum Institute) and manufacturing facilities of flow control and wellhead equipment and manifold fittings, with API-monogrammed equipment.

We have been in the industry for over 35 years, and our team comprises ambitious entrepreneurs and highly skilled veterans with decades of experience in the industry. Our team comprises engineers, technicians, and managers with vast industry knowledge, which assists us in delivering the highest quality products with excellent lead times and delivery.

Our business objective is to open our own manufacturing and forges and have our own brand of products with no middle man to give our customers the best quality and price. We are looking for an investor and seek 500,000 to a

1,000,000. We plan to have a machine shop in Mexico in our company-owned facility.

MISSION STATEMENT

The mission of TAXM PUMPS SA DE CV is to provide world-class products and services that meet all specified requirements for safety, reliability, and lead times. We are committed to achieving customer satisfaction through effective quality control management and continuous improvement, striving for excellence with growth through innovation, leading with the highest quality practices, enhancing operational efficiencies, and attaining excellence beyond our customers' imagination. Our primary focus is on offshore and onshore oil exploration and mining industries, and we aim to manufacture and engineer products to international and API standards and customer requirements. Our goal is to establish ourselves as a leading manufacturer and supplier of chemical pumps, mud pumps, flowline equipment, and parts for all types of equipment, original and aftermarket, in the USA, Mexico, and South America.

VISION STATEMENT

The vision of TAXM PUMPS SA DE CV is to be the leading provider of high-quality pumps, flowline equipment, and parts to the oil, gas, and mining industries in Mexico, the United States, and South America. We strive to achieve excellence through innovation, operational efficiency, and exceptional customer service, while maintaining the highest standards of quality and safety. Our goal is to become a trusted partner and a reliable source of superior products and services for our customers, and to contribute to the growth and success of the industries we serve.

GOALS AND OBJECTIVES

GOALS

- To establish our own manufacturing and forges in order to increase control over our production process, reduce costs and improve lead times.
- To have our own brand of products without middlemen to provide our customers with the best quality and prices.
- To establish a machine shop in Mexico in our company-owned facility to increase efficiency and reduce costs.
- To expand our market share in the oilfield and mining industries in the USA, Mexico, and South America.

OBJECTIVES

- Establish a manufacturing facility within the next two years, allowing us to control production processes and reduce costs.
- Launch our own brand of products within the next year, which will help us to improve our margins and control our supply chain.
- Establish a machine shop in Mexico within the next 18 months, which will allow us to produce parts in-house and reduce lead times.
- Increase our market share by 20% within the next two years, by expanding our sales force and developing partnerships with key customers and distributors.
- Increase our revenue by 50% within the next year, by expanding our product line, increasing our marketing efforts, and leveraging our relationships with key customers and distributors.

KEYS TO SUCCESS

- **Quality products and services:** TAXM PUMPS SA DE CV has a commitment to providing world-class products and services that meet all specified requirements for safety, reliability, and lead times. The company's focus on manufacturing and engineering products to international and API standards and customer requirements could help differentiate it from competitors.
- **Experienced team:** The team at TAXM PUMPS SA DE CV consists of ambitious entrepreneurs and highly skilled veterans with decades of experience in the oil and mining industries. This could be a major advantage in terms of expertise and industry knowledge.
- **Inventory management:** The company has experienced issues with lack of inventory, resulting in lost sales. By opening its own manufacturing and forging facilities, and having a local inventory, the company aims to reduce lead times and better serve its customers.
- **Marketing and advertising:** To launch its own brand of products, TAXM PUMPS SA DE CV plans to attend expos and conferences, and utilize social media campaigns on Google, Facebook, Instagram, Twitter, and TikTok. Effective marketing and advertising strategies could be critical to gaining market share and increasing revenue.
- **Financial management:** With the goal of raising \$500,000 to \$1,000,000 from investors, it will be important for TAXM PUMPS SA DE CV to effectively manage its finances. This includes managing expenses, setting realistic revenue targets, and ensuring a healthy cash flow to fund operations and expansion.

GUIDING PRINCIPLES

- **Customer satisfaction:** Providing the highest quality products and services to meet customer requirements and ensure their satisfaction is the primary focus.
- **Continuous improvement:** Striving for continuous improvement in all aspects of the business, from product design and manufacturing to customer service and support.
- **Compliance with standards:** Ensuring compliance with international and API standards for safety, reliability, and quality is essential.
- **Innovation:** Pursuing innovation in product design and manufacturing processes to stay ahead of competitors and provide customers with cutting-edge solutions.
- **Employee development:** Investing in the development and training of employees to build a skilled and motivated workforce that can deliver high-quality products and services.
- **Integrity and ethics:** Conducting all business operations with integrity and in accordance with ethical principles.
- **Sustainability:** Considering the long-term environmental and social impact of business operations and making efforts to promote sustainability.
- **Financial responsibility:** Maintaining sound financial practices to ensure the long-term viability of the business and provide a solid return on investment for shareholders.

These guiding principles can help TAXM PUMPS SA DE CV establish a strong foundation for success and guide its decisions and actions as it grows and expands.

PRODUCT AND SERVICE

TAXM Pumps SA de CV Industries is a global API approved manufacturer and supplier of flow control products, wellhead equipment, manifold fittings, and equipment for the oil, gas, and mining industries. Our primary focus and specialization lie in API 6A Monogrammed equipment utilized on onshore and offshore drilling units.

We offer a wide range of high-quality products that meet all specified requirements for safety, reliability, and timely delivery. Our experienced staff holds expertise in custom manufacturing of products as per international standards and client requirement. Our team comprises ambitious entrepreneurs and highly skilled veterans with decades of experience in the oilfield equipment manufacturing industry, including engineers, technicians, and management graduates with vast industry knowledge.

API-6A

- Tees & crosses
- Adapter & spacer spools
- Flanged connectors
- Threaded connectors
- Bull plugs
- Valve removal plugs
- Ring joint gaskets

FLOW LINE PRODUCTS

- Crossovers
- Swages
- Pup joints
- Crosses
- Elbows
- Tees
- Flow line bull & gage plugs
- Swivel joints
- Hose loops
- Hammer unions

API-6A

STUDED CROSS

Studded cross specification 6A crosses and tees with studded connections in all API 6A sizes and pressure classes. These products are manufactured in accordance with the dimensions and design criteria specified in API specification 6A.

KEY FEATURES

- TAXM Pumps SA de CV Industries manufactures API
- Designed according to the standards and tables in API specification 6A
- Can be designed in any combination of sizes and connections
- Available for all API rated working pressures
- Available with stainless steel 316L or Inconel625 corrosion resistant alloy ring grooves

- Normally provided with tap end studs and nuts

SPACER SPOOLS

TAXM Pumps SA de CV Industries manufactures spacer spool with a variety of end and outlet configurations based on customer needs.

KEY FEATURES

- Flanged and studded ends available, in any combination
- Manufactured for any combination of size and pressure ratings
- Spacer spools are designed to minimize length while allowing sufficient clearance for wrenches or clamps, unless otherwise specified by the customer
- The standard design for spacer spools does not include outlets, although outlets can be added as specified
- Available for general services and sour services in compliance with any temperature rating and material requirements specified in API specification 6A
- Available with stainless steel 316L or Inconel 652 corrosion resistant alloy ring grooves
- Tap-End studs and nuts are normally provided with studded end connections

API FLANGES

TAXM Pumps SA de CV Industries manufactures 6B and 6BX flanges in various sizes & pressure ratings as per API 6A. Most common material is low alloy steel AISI 4130, AISI 410 or UNS 31803 which are used for some of the critical services. application of CRA [SS 316 or Nickel alloy 625] enhance the corrosion resistance ability of ring groove, thus enhancing the product life.

6B FLANGES

6B flanges are ring joint type and are not designed for face to face make up. Bolting force acts the metallic ring gasket. 6B flanges are of through bolted or studded design. R or RX are ring groove type.

TYPES OF 6B FLANGES

- Welding neck flanges
- Blind flanges
- Threaded flanges

6BX FLANGES

6BX flanges are ring joint type and has a raised face. joining make up bolting force acts on the raised face of the flange when the gasket is properly seated.

This support prevents damage to the flange or gasket from excessive bolt torque. therefore, 6BX connections has raised face. Type 6BX flanges are of through bolted or studded design. Face to face contact is not necessary for the proper functioning of the 6BX flange. 6BX flanges have BX ring gasket groove.

TYPES OF 6BX FLANGES

- Welding neck flanges
- Blind flanges
- Threaded flanges

RING JOINT GASKET

TAXM Pumps SA de CV Industries manufactures metallic ring joint gaskets which are suitable for high temperature applications. the gaskets are available in R, RX, BX styles and in oval/octagonal profiles. in addition, these units are manufactured in accordance with specific tolerance on CNC machines. Our ring joint gaskets fully comply with the ASME B1620 standard and the API spec 6A requirements [wherever applicable].

WELD NECK FLANGE

Our weld neck flanges feature high strength, good toughness and high resistance to corrosion, high pressure and temperature. Can be customized to meet specific requirements with different butt weld end sizes and a range of material of construction with options to meet NACE MR-0175. the ring grooves can be reinforced with inlay SS/Inconel to inhibit corrosion in carbon and low alloy steels.

KEY FEATURES

This is most common type of high-pressure pipe flange. They are distinguished from other type of pipe flanges by their long-tapered hub and gentle transition PF thickness in the region of the butt weld joining them to the pipe. the long-tapered hub provides an important reinforcement of the weld neck flange proper in terms of strength and resistance to dishing. Wide range of selection for material and specification, [API, ANSI, MSS, etc.]

HAMMER UNIONS

TAXM Pumps SA de CV industries manufacture unions that are available in a choice of end connections. API line pipe threads are standard. Butt weld ends and socket weld ends can also be provided. The customer shall specify the schedule of pipe while ordering.

OUR SERVICES

Our services include:

- **Custom manufacturing:** We offer custom manufacturing of products as per international standards and client requirements. Our experienced staff can help design and manufacture custom products to meet the specific needs of our clients.
- **Technical support:** We provide technical support to our clients to ensure the proper installation and operation of our products. Our experienced technicians are available to provide technical assistance and advice whenever our clients need it.
- **After-sales support:** We provide after-sales support to our clients to ensure that their equipment is operating efficiently and reliably. Our after-sales support includes maintenance, repair, and replacement services for our products.

Product for our services is available and all H25 service parts of unions manufactured by us conform to the latest NACE specifications. Unions for low temperature services can be supplied with suitable impact value testing.

Our 6B flanges are ring joint type and are not designed for face to face make up. The bolting force acts on the metallic ring gasket. 6B flanges are of through-bolted or studded design, and R or RX are ring groove type. Types of 6B flanges include welding neck flanges, blind flanges, and threaded flanges.

Our 6BX flanges are ring joint type and have a raised face. Joining make-up bolting force acts on the raised face of the flange when the gasket is properly seated. This support prevents damage to the flange or gasket from excessive

bolt torque. Therefore, 6BX connections have raised face. Type 6BX flanges are of through-bolted or studded

INDUSTRY ANALYSIS

The oil, gas, and mining industries are highly competitive and heavily regulated. The industry is characterized by fluctuating commodity prices, a high level of capital investment, and long lead times for project development. There are many players in this industry, from small, specialized companies to large multinational corporations.

In terms of the supply of chemical pumps, mud pumps, and flowline equipment, there are several established companies in the market. However, there is always room for new entrants that can offer high-quality products at competitive prices.

The industry is also affected by geopolitical events, as changes in government policies and international relations can impact the demand for oil, gas, and mining products. In addition, environmental concerns are becoming more important in the industry, with a growing push towards renewable energy sources and more sustainable practices.

Overall, the oil, gas, and mining industries are complex and dynamic, with many factors impacting the supply and demand for products and services. Companies in this industry must be able to adapt quickly to changing market conditions and be highly innovative in their approach to product development and marketing.

MARKET OVERVIEW

The market for our products, which includes chemical pumps, mud pumps, flowline equipment, valves, and parts, is primarily driven by the demand from the oil, gas, and mining industries. These industries rely on our products for their

drilling, refining, and processing operations, making them crucial for their operations.

Mexico and the United States are our primary markets, with the states of Veracruz, Tamaulipas, Tabasco, and Campeche in Mexico, and Texas in the United States being our primary target locations. These areas have a high concentration of oil, gas, and mining companies, and therefore, have high demand for our products. In addition, we are also targeting the South American market, which also has a significant presence in the oil and gas industry.

Our products are sold at various price points, with our pumps ranging from \$3,000 to \$250,000, and parts and equipment ranging from \$2 to \$50,000. Our target market consists of companies in the oil, gas, and mining industries that require high-quality, reliable products that meet international standards and customer specifications. We plan to achieve our business objectives by providing high-quality products at competitive prices, and by maintaining a strong relationship with our customers through exceptional customer service.

Overall, the market for our products is highly competitive, with several established players in the industry. However, we believe that our decades of experience in the industry, our commitment to quality, and our focus on customer satisfaction will give us a competitive advantage and allow us to succeed in this market.

INDUSTRY TRENDS

Here are some current industry trends in the oil and gas/mining equipment sector:

- **Increased focus on environmental sustainability:** Companies in the industry are focusing on developing more environmentally sustainable products and reducing their carbon footprint.
- **Adoption of digital technology:** There is a growing trend towards digitalization in the industry, with the use of data analytics, automation, and other digital tools to improve operational efficiency and reduce costs.
- **Growing demand for automation:** Automation is becoming increasingly important in the industry, with companies investing in automated drilling, extraction, and production technologies to improve efficiency and reduce costs.
- **Focus on safety:** Safety is a top priority in the industry, with companies investing in technologies and processes to improve worker safety and reduce the risk of accidents.
- **Growth in emerging markets:** Emerging markets such as Asia, Africa, and South America are expected to see significant growth in the oil and gas/mining industry, driven by rising demand for energy and minerals.
- **Increasing importance of data analytics:** Data analytics is becoming more important in the industry, with companies using data to optimize operations, reduce costs, and improve performance.
- **Innovation in materials and manufacturing:** There is a growing trend towards innovation in materials and manufacturing processes, with companies investing in new materials and manufacturing techniques to improve the performance and durability of equipment.

- **Growth in renewable energy:** While oil and gas will continue to be important sources of energy, there is a growing trend towards renewable energy sources such as wind and solar, which will impact the industry in the long term.

TARGET MARKET ANALYSIS AND DEMOGRAPHICS

As a supplier of chemical pumps, mud pumps, and flowline equipment, TAXM PUMPS SA DE CV primarily targets customers in the oil, gas, and mining industries in Mexico, the USA, and South America. These industries require high-quality and reliable equipment to ensure safe and efficient operations.

In Mexico, the company targets the states of Veracruz, Tamaulipas, Tabasco, and Campeche, which are home to several oil and gas fields and mining operations. These states have a large concentration of companies in the industry and offer significant opportunities for growth. In the USA, the company targets Texas, specifically the cities of McAllen, Laredo, San Antonio, Houston, and Midland-Odessa, which are major hubs for the oil and gas industry.

The demographic profile of TAXM PUMPS' target market includes individuals and businesses in the oil, gas, and mining industries. The target customers are typically engineers, technicians, and managers with a deep understanding of the technical requirements of the industry. These customers demand high-quality and reliable equipment that can withstand harsh environments and operate efficiently.

The customers may include large multinational companies with significant operations in the oil, gas, and mining industries, as well as smaller, independent companies with specialized needs. The target market is diverse and includes

both onshore and offshore operations, as well as mining and mineral processing operations.

In terms of the age and gender demographics, the target market is likely to be predominantly male and middle-aged, reflecting the industry's traditional workforce. However, there is a growing trend towards diversity and inclusion in the industry, with more women and younger professionals entering the field. TAXM PUMPS recognizes the importance of catering to the changing demographics of the industry and is committed to providing high-quality equipment and services to all customers regardless of gender or age.

In summary, TAXM PUMPS' target market consists of individuals and businesses in the oil, gas, and mining industries in Mexico, the USA, and South America. The target customers are typically engineers, technicians, and managers who demand high-quality, reliable equipment that can withstand harsh environments and operate efficiently. The market is diverse and includes both onshore and offshore operations, as well as mining and mineral processing operations.

COMPETITION ANALYSIS

In the oil, gas, and mining industry, there are several competitors that offer similar products and services to TAXM PUMPS SA DE CV. Some of the main competitors include:

- **Caterpillar:** Caterpillar is a global leader in the manufacturing of mining and construction equipment, as well as power systems, engines, and parts. They acquired Kemper and SMC, which were the original developers of flowline equipment.

- **Weatherford International:** Weatherford is a multinational oilfield service company that provides products and services for drilling, evaluation, completion, production, and intervention.
- **Schlumberger Limited:** Schlumberger is the world's largest oilfield services company that provides technology, project management, and information solutions to the oil and gas industry.
- **Baker Hughes Company:** Baker Hughes is an American industrial service company that provides products and services for oil and gas exploration, drilling, completion, and production.
- **National Oilwell Varco:** National Oilwell Varco is an American multinational corporation that provides equipment and components for oil and gas drilling and production.

While these companies are major players in the industry, TAXM PUMPS SA DE CV can differentiate itself by focusing on its primary focus on offshore and onshore oil exploration, and mining industries. Additionally, TAXM PUMPS SA DE CV can focus on its commitment to providing world-class products and services to meet all specified requirements for safety, reliability, and lead times, as well as its goal of manufacturing and engineering products to international and API standards and customer requirements. Furthermore, TAXM PUMPS SA DE CV can differentiate itself by offering a more personalized service to its customers, as well as having its own manufacturing and forges, and a machine shop in Mexico in its company-owned facility.

ECONOMIC ENVIRONMENT

The economic environment for TAXM PUMPS SA DE CV is heavily dependent on the oil, gas, and mining industries in Mexico and the United States. These industries are subject to fluctuations in commodity prices, which can impact demand for our products and services. Additionally, changes in government regulations and policies, both in Mexico and the United States, can impact the growth and stability of these industries.

On the positive side, there has been increased investment in the oil and gas sector in Mexico in recent years, including exploration and production activities, which presents opportunities for growth for our company. The United States has also experienced a surge in oil and gas production, which can result in increased demand for our products and services.

However, the COVID-19 pandemic has had a significant impact on the global economy, including the oil and gas industry. Reduced demand for energy due to decreased economic activity and travel restrictions has led to a decline in oil prices. This has had a negative impact on the industry as a whole, including our company.

In order to mitigate these risks, our company will focus on diversifying our product offerings and expanding our target markets beyond Mexico and the United States. We will also closely monitor changes in government policies and regulations and adjust our business strategies accordingly. Additionally, we will continue to prioritize quality and customer satisfaction to maintain a strong reputation and competitive advantage in the market.

SWOT ANALYSIS

STRENGTHS

- 35 years of experience in the oil, gas, and mining industry
- API recognition for our products
- Highly skilled and experienced team of engineers, technicians, and managers
- Strong focus on customer satisfaction and quality control
- Established manufacturing facilities in India
- Wide range of products offered including pumps, flowline equipment, valves, and parts

WEAKNESSES

- Lack of inventory has resulted in lost sales in the past
- Reliance on external manufacturing facilities in India
- Limited brand recognition and market share compared to competitors
- Limited marketing efforts

OPPORTUNITIES

- Opening our own manufacturing and forges to increase control over production and reduce costs
- Developing our own brand of products to increase brand recognition and customer loyalty
- Expanding into South America as a new market
- Establishing a machine shop in Mexico to improve efficiency and reduce lead times

THREATS

- Competition from established companies such as Caterpillar
- Economic and political instability in target markets
- Fluctuations in the price of oil and other natural resources
- Changes in regulations and standards for the industry

MARKETING & SALES

MARKETING OBJECTIVES

1. **Increase brand awareness:** Given that TAXM PUMPS SA DE CV is looking to establish its own brand of products, it will be crucial to increase brand awareness among its target market. This will be achieved through a combination of advertising, digital marketing, and attending industry events.
2. **Increase market share:** The oil, gas, and mining industries are highly competitive, so it will be important for TAXM PUMPS SA DE CV to capture a larger share of the market. This will be done through competitive pricing, offering high-quality products, and providing exceptional customer service.
3. **Expand distribution channels:** Currently, TAXM PUMPS SA DE CV works with several companies that represent them in various cities, but they want to establish their own distributors to control sales and keep competition away. Expanding distribution channels will help to reach more customers and increase sales.
4. **Improve customer retention:** As a supplier of industrial equipment, it is important for TAXM PUMPS SA DE CV to establish long-term relationships with customers. Improving customer retention can be done through excellent customer service, timely delivery of products, and offering competitive pricing.
5. **Increase sales revenue:** TAXM PUMPS SA DE CV has set a goal of manufacturing and having a local inventory to attend to customers without lead times of 2 to 3 months. This will help to increase sales revenue by reducing the number of lost sales due to lack of inventory. Additionally,

a strong digital marketing strategy and attending industry events will help to generate new sales leads.

MARKETING STRATEGY

- **Build brand awareness:** Since the company is looking to establish its own brand and reduce reliance on middlemen, it's important to build awareness of the brand in the target markets. This can be achieved through a combination of digital marketing (e.g., search engine optimization, social media ads, email campaigns), events (e.g., trade shows, conferences), and targeted advertising (e.g., industry publications).
- **Targeted outreach to potential distributors:** As mentioned, the company wants to establish a network of distributors with local inventory. This can be achieved through targeted outreach to potential partners in the target markets. The company will leverage their existing relationships and industry knowledge to identify potential partners, and then reach out with a clear value proposition and incentives for becoming a distributor.
- **Emphasize quality and reliability:** The company's commitment to quality and reliability is a key selling point in the oil, gas, and mining industries where equipment failures can have serious consequences. The marketing messaging should emphasize the company's commitment to meeting API standards and customer requirements, and highlight customer testimonials and case studies that demonstrate the quality and reliability of the products.
- **Leverage industry expertise:** With over 35 years of experience in the industry, the company's team has deep knowledge and expertise that will be leveraged in marketing efforts. For example, the company will create

content such as blog posts, webinars, and whitepapers that share insights and best practices for the target industries.

- **Use data to optimize campaigns:** To maximize the ROI of marketing efforts, the company will track and analyze data from all channels to identify what's working and what's not. This will include metrics such as website traffic, email open rates, and conversion rates. With this data, the company will optimize campaigns and allocate resources to the channels that are driving the most leads and sales.

SALES FORECASTING AND MEASUREMENT

Sales forecasting is crucial to any business as it helps predict future sales and revenue. In the case of TAXM PUMPS SA DE CV, there are various factors to consider when forecasting sales. These will include market demand, competition, industry trends, economic conditions, and marketing strategies, among others.

To forecast sales, TAXM PUMPS SA DE CV will start by analyzing their historical sales data over the past few years. This data can be used to identify any seasonal trends or fluctuations in sales. They may also look at the current market conditions, such as the demand for oil, gas, and mining equipment, to predict future sales.

In terms of measurement, TAXM PUMPS SA DE CV may use various performance indicators to monitor their sales. These indicators may include the number of units sold, revenue generated, profit margins, and customer satisfaction levels. These metrics can be used to track the effectiveness of the company's sales strategies and make any necessary adjustments.

TAXM PUMPS SA DE CV may also use a sales pipeline to track their sales progress. This pipeline can help identify any bottlenecks or areas where sales are slowing down, allowing the company to take corrective actions. Additionally, using customer relationship management (CRM) software can help track customer interactions and improve customer engagement, leading to increased sales.

Overall, forecasting and measuring sales is crucial for the success of any business, and TAXM PUMPS SA DE CV will regularly analyze their sales data and performance indicators to make informed decisions and drive business growth.

OPERATIONAL PLAN

LOCATIONS AND FACILITIES

TAXM PUMPS SA DE CV is located at Campos Eliseos #174, Colonia Bosque de Chapultepec 1 Section, Municipio Miguel Hidalgo, Mexico City, 11580. In addition to this, the company also has an office located at 5419 San Bernardo, Laredo, Texas 78041 in the United States.

MANUFACTURING FACILITY

The facilities of TAXM PUMPS SA DE CV include manufacturing facilities, machine shops, warehouses, and offices. The company currently works with four manufacturing facilities in India but plans to open its own manufacturing and forging facilities in the near future. Additionally, the company plans to have its

own machine shop in Mexico in its company-owned facility. The offices of TAXM PUMPS SA DE CV are equipped with modern equipment and technology to ensure efficient operations and effective communication with clients.

EXPLORATION AND DEVELOPMENT

As a supplier of pumps, flowline equipment, and parts to the oil, gas, and mining industries, our focus is on providing high-quality products that meet international and API standards, as well as our customers' specific requirements for safety, reliability, and lead times.

In terms of exploration and development, we do not engage in direct exploration and drilling activities ourselves, but we do support these activities through our products and services. We work closely with our customers to understand their needs and provide them with the equipment and parts necessary for their exploration and development projects.

In addition, we aim to continually improve our products and services to meet the evolving needs of the industry. This includes investing in our own manufacturing and forging facilities, as well as having our own machine shop in Mexico, so we can offer our customers high-quality products at competitive prices without relying on middlemen. We also attend expos and conferences to stay up-to-date on the latest industry trends and technologies, and we utilize digital marketing campaigns to expand our reach and grow our customer base.

EXTRACTION AND PRODUCTION

To begin with, the extraction and production of chemical pumps, mud pumps, flowline equipment, stainless steel connections and tubing, valves, and parts for all types of equipment will be done through our manufacturing and forging

facilities. Currently, we work with four manufacturing facilities in India, but we plan to open our own manufacturing and forges to have better control over the quality of our products and to reduce lead times.

Our team consists of experienced professionals with decades of experience in oil and mining industries, including engineers, technicians, and managers with vast industry knowledge, assisting in delivering the highest quality products with excellent lead times and delivery. We will manufacture and engineer our products to international and API standards and customer requirements to ensure that they meet all specified requirements for safety, reliability, and lead times.

Our target markets are the oilfield and mining industries in the USA, Mexico, and South America, where we have been providing our products for the past 35 years. We plan to expand our reach by having distributors that have inventory of our brand, which will help us control sales and keep competition at bay.

TRANSPORTATION AND LOGISTICS

Transportation and logistics are crucial components of the oil, gas, and mining industries, as they involve the movement of materials, equipment, and personnel to and from drilling sites, refineries, and distribution centers. Effective transportation and logistics strategies can help minimize costs, improve efficiency, and ensure timely delivery of products.

For TAXM PUMPS SA DE CV, transportation and logistics would involve the shipment of its products to customers located in different regions, both domestically and internationally. The company would need to establish relationships with reliable shipping companies that can transport their products safely and efficiently.

In addition to shipping logistics, the company would need to manage the logistics of its own operations, such as inventory management and supply chain management. This would involve coordinating with its manufacturing facilities to ensure that they have sufficient raw materials and supplies to meet production demands.

To optimize its transportation and logistics operations, TAXM PUMPS SA DE CV may consider implementing the following strategies:

- **Use of technology:** Utilizing technology can help the company streamline its logistics operations by improving communication and data management. This could include using GPS tracking to monitor shipments and using inventory management software to track products.
- **Establishing distribution centers:** TAXM PUMPS SA DE CV could establish distribution centers in strategic locations to ensure timely delivery of products to customers. This would involve careful analysis of customer demand patterns and market trends to identify optimal locations.
- **Negotiating contracts with shipping companies:** The company could negotiate long-term contracts with shipping companies to ensure reliable and cost-effective transport of its products.
- **Outsourcing logistics:** TAXM PUMPS SA DE CV could outsource its logistics operations to third-party logistics providers, who specialize in managing transportation, warehousing, and other logistics services. This could help reduce costs and improve efficiency.

By implementing effective transportation and logistics strategies, TAXM PUMPS SA DE CV can ensure timely delivery of its products, reduce costs, and improve customer satisfaction.

HEALTH AND SAFETY

As a business operating in the oil, gas, and mining industry, it is essential to prioritize health and safety measures to protect our employees, customers, and the environment. Here are some of the health and safety measures we plan to implement in our operations:

- **Training:** All employees will receive comprehensive training on safety measures related to their specific roles, including hazard identification, emergency response, and incident reporting.
- **Personal Protective Equipment (PPE):** We will provide all employees with appropriate PPE, such as safety glasses, gloves, hard hats, and steel-toed boots, to minimize the risk of injury on the job.
- **Equipment Maintenance:** Regular maintenance and inspections of all equipment, including pumps, valves, and flowline equipment, will be conducted to ensure they are in safe working condition.
- **Safety Audits:** We will conduct regular safety audits to identify potential hazards and areas for improvement in our operations.
- **Emergency Response Plans:** We will have emergency response plans in place for various scenarios, such as spills, fires, or natural disasters, to ensure a quick and efficient response to any emergency situation.
- **Environmental Protection:** We will implement measures to prevent environmental pollution, such as proper disposal of hazardous waste and spill prevention and control.
- **Compliance with Regulations:** We will comply with all applicable health and safety regulations, including those set by local and national authorities, as well as industry standards such as the API.

By implementing these health and safety measures, we can minimize the risk of accidents, injuries, and environmental damage in our operations and ensure the well-being of our employees, customers, and the community.

REGULATORY COMPLIANCE

As a business operating in the oil, gas, and mining industry, TAXM PUMPS SA DE CV will comply with various regulations and standards to ensure the safety and health of its employees, customers, and the environment.

One of the most important regulatory bodies in this industry is the American Petroleum Institute (API), which sets standards for equipment and operations. TAXM PUMPS SA DE CV will ensure that its products meet API standards and are properly labeled with the API monogram.

Additionally, the company must comply with environmental regulations and obtain necessary permits to operate. In Mexico, the Secretaría de Medio Ambiente y Recursos Naturales (SEMARNAT) is responsible for regulating environmental issues related to oil, gas, and mining activities. In the United States, the Environmental Protection Agency (EPA) is the main regulatory body for these activities.

The company will also comply with labor laws and regulations to ensure the safety and fair treatment of its employees. In Mexico, the Federal Labor Law (Ley Federal del Trabajo) establishes the rights and obligations of employers and employees. In the United States, the Occupational Safety and Health Administration (OSHA) sets standards and regulations related to workplace safety.

Furthermore, TAXM PUMPS SA DE CV will comply with import and export regulations if it conducts business across borders. In Mexico, the Servicio de

Administración Tributaria (SAT) regulates imports and exports. In the United States, the Department of Commerce and the Department of Homeland Security oversee import and export regulations.

To ensure regulatory compliance, TAXM PUMPS SA DE CV will develop and implement a compliance program that includes policies, procedures, and training for employees. The program will also include regular audits and assessments to identify and address any areas of non-compliance. By ensuring regulatory compliance, the company will avoid legal and financial penalties, protect the health and safety of its employees and customers, and maintain a positive reputation in the industry.

ORGANIZATION AND MANAGEMENT

TAXM PUMPS SA DE CV is led by a team of experienced and knowledgeable professionals with decades of experience in the oil and mining industries. The team consists of ambitious entrepreneurs, skilled veterans, engineers, technicians, and managers who work together to deliver the highest quality products to customers.

John McLeroy serves as the Business Manager of the company, responsible for overseeing all business operations, including production, marketing, and sales. Wendy Godoy Mendoza serves as the administrator, responsible for managing the administrative and financial aspects of the company.

In addition to the key personnel, the company has a team of skilled and experienced employees who specialize in manufacturing, engineering, quality control, and customer service. The company places a strong emphasis on hiring and retaining the best talent in the industry to ensure that its customers receive the highest quality products and services.

The company's organizational structure is designed to be flexible and adaptable to changing market conditions, with clear lines of communication and decision-making authority. The company encourages an open and collaborative culture, with a focus on continuous improvement and innovation.

TAXM PUMPS SA DE CV is committed to regulatory compliance, ensuring that all its products meet or exceed international and API standards. The company has established quality control management systems to ensure that all products are manufactured to the highest standards of safety, reliability, and performance. The company's commitment to quality is reflected in its ISO 9001:2015 certification, which it obtained in 2017.

FINANCIAL PLAN

The following section contains the financial information for **TAXM PUMPS SA DE CV**. Tables and charts show annual projections for the first five business years.

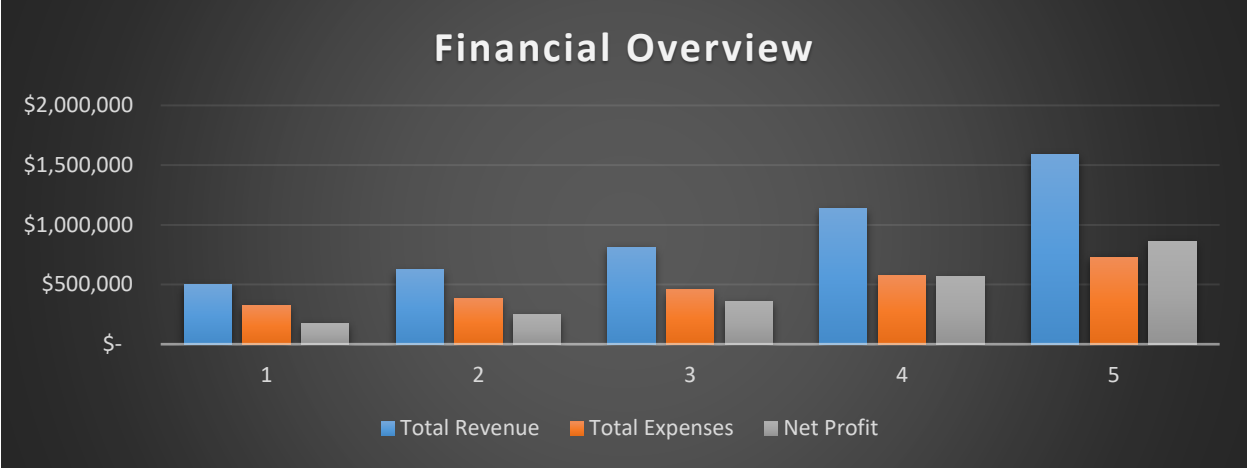

STARTUP ANALYSIS

TAXM PUMPS SA DE CV			
	Expansion Expenses		
	Capital Expenditure	Cost	
	Expansion Expenses and Equipment	\$	1,000,000
	Total Expansion Expenses	\$	1,000,000
	Owner's Investment	\$	-
	Investor	\$	1,000,000
	Total Investment	\$	1,000,000

FINANCIAL OVERVIEW

Below is the financial overview showing the profitability of the business as the sales increases with little change in the cost. The profit is seen to increase with sales.

Financial Overview					
	2023	2024	2025	2026	2027
Total Revenue	\$ 500,000	\$ 625,000	\$ 812,500	\$ 1,137,500	\$ 1,592,500
Variable Costs/Expenses	\$ 150,000	\$ 187,500	\$ 243,750	\$ 341,250	\$ 477,750
Fixed Costs	\$ 176,200	\$ 192,520	\$ 210,472	\$ 230,219	\$ 251,941
EBITDA	\$ 173,800	\$ 244,980	\$ 358,278	\$ 566,031	\$ 862,809
Depreciation	\$ -	\$ -	\$ -	\$ -	\$ -
Taxes	\$ -	\$ -	\$ -	\$ -	\$ -
Total Expenses	\$ 326,200	\$ 380,020	\$ 454,222	\$ 571,469	\$ 729,691
Net Profit	\$ 173,800	\$ 244,980	\$ 358,278	\$ 566,031	\$ 862,809

PROFIT AND LOSS

The below table is the profit and loss projection for the first five business years. The sales are seen to increase each year, causing a considerable increase in the net profit too.

Profit and Loss Statements					
	2023	2024	2025	2026	2027
	\$	\$	\$	\$	\$
Sales

Net Profit/Sales %	34.76%	39.20%	44.10%	49.76%	54.18%

From the above analysis, it is projected that the business will have a total revenue of **\$500,000** in the first year of business activities. Every business always aspires to increase its sales. With the marketing strategy adopted, it is assumed that this will yield an increase in the subsequent years of business operations, thereby, causing the revenue for each year to increase too.

The volume of revenue influences the profit that will be made during the year, therefore revenue generated in the course of running the business results in an increase in profit made by the business after taking care of all expenses.

BREAK-EVEN ANALYSIS

Break-even is the point where the business neither makes profit nor loss. This means that at break-even, the business is only able to pay up its expenses both fixed and variable cost without any excess. The essence of break-even is to determine the number of sales that could lead to profitability

Break Analysis	Even				
	2023	2024	2025	2026	2027
Fixed cost	\$ 176,200	\$ 192,520	\$ 210,472	\$ 230,219	\$ 251,941
Variable Cost %	30.00%	30.00%	30.00%	30.00%	30.00%
Gross Margin %	70.00%	70.00%	70.00%	70.00%	70.00%
Break Income	\$ 251,714	\$ 275,029	\$ 300,674	\$ 328,885	\$ 359,916
Revenue	\$ 500,000	\$ 625,000	\$ 812,500	\$ 1,137,500	\$ 1,592,500

The business is seen to break the even in the first year of business activities. This means that there must be more than \$251,714 worth of sales yearly before any profit can be recorded. The above analysis can be seen in the below graph showing the breakeven income and revenue.
