EXECUTIVE SUMMARY

Omega Center for Special needs education, will be an innovative and compassionate center for special needs education and one-on-one therapy, and will be located in the heart of Dubai. Our mission is to empower individuals with diverse special needs, enhance their quality of life, and create a more inclusive society. We will provide specialized educational programs and personalized therapy services to children and adults with a wide range of special needs. Our center is a beacon of hope for those seeking support, guidance, and a brighter future. We will offerings encompass special education programs, one-on-one therapy sessions, family support services, and community engagement activities. This holistic approach ensures that our clients receive the tailored care they need. The feasibility study evaluates the business's potential success by assessing market demand, legal considerations, and sustainable practices. An online presence and e-commerce platform will be developed to attract a broader clientele. The brand's reputation will be safeguarded through exceptional customer service and brand consistency.

Omega Center for Special needs education have the expectations for the company's growth, over the next five years to expand its market presence both geographical and across the states. We are beacon of hope and support for individuals and families in Dubai facing the challenges of special needs.

Technical feasibility is a key aspect to evaluate the viability of the Omega Center for Special needs education. Research and development efforts will be required to design and construct the center to meet the specific needs of special education and therapy. A thorough inspection and assessment of the building's structural integrity of classrooms, therapy rooms, administrative spaces, and common areas would be conducted to that the facility is accessible to individuals with physical disabilities.

The economic feasibility of the business relies on the expected client volume, pricing structure, and potential partnerships with schools, healthcare providers, and government agencies. Market research will help to identify the potential demand and client segments for the special education service.

In conclusion, this feasibility study aims to evaluate the potential success of the Omega Center for Special needs education business. By addressing technical challenges, ensuring economic viability, and considering location sustainability, the Omega Center for Special needs education represents an innovative solution to getting the best services when it comes to special needs for education. The subsequent sections of this study will delve into the detailed analysis of the technical, economic, and Location feasibility of the Omega Center for Special needs education, providing a comprehensive understanding of its potential success in the targeted area.

COMPANY SUMMARY

Omega Center for Special needs education will be a specialized center for special needs education and one-on-one therapy located in Dubai, catering to children and adults with a wide range of special needs. Our center is committed to delivering tailored educational programs and therapeutic interventions to empower individuals with special needs and enhance their quality of life. We are strategically located in a accessible area in Al Rayyan, Quater, offering a safe, welcoming, and inclusive environment for our clients. This location is chosen to ensure easy access for families and caregivers.

Omega Center for Special needs education, tailored her curriculum and learning approaches for various special needs, fostering academic, social, and emotional growth and also our individualized therapy sessions, will includes speech therapy, occupational therapy, and more, delivered by experienced professionals. Our center will provide support for families, caregivers, and the community to create a holistic support system for our clients.

Our center strives to create a positive social impact by empowering individuals with special needs, improving their quality of life, and raising awareness about

special needs in Dubai. We aim to be an integral part of the special needs community and contribute to its development and well-being.

MISSION STATEMENT

Our mission is to help children with psychiatric, physical, educational, and social challenges overcome their challenges by providing effective educational and therapeutic services at affordable fees.

VISION

Our vision is to be the leading service provider in the field and be the voice of people with special needs so that they live with dignity in their families and the community.

OBJECTIVES OF THE FEASIBILITY STUDY

The objective of conducting a feasibility study for Omega Center for Special needs education in Dubai is to thoroughly assess the practicality and viability of the business venture. This study serves as a critical pre-launch phase, aiming to provide essential insights and data to guide informed decision-making. Specifically, the feasibility study serves the following objectives:

- **Assessment of Market Viability:** The primary objective of the feasibility study is to determine the level of demand for special education and therapy services in Rayyan, Qatar. This includes understanding the specific needs of the target population, such as children and adults with various special needs.
- **Identification of Potential Challenges:** The study aims to identify potential challenges and obstacles the business may face in its location and within the Special needs for Education industry. This includes assessing competition, regulatory requirements, and economic risks.

- **Technical Feasibility:** Examine the technical aspects, including the condition of the building, infrastructure requirements, and other technological considerations to determine if the business can operate efficiently.
- **Environmental and Location Feasibility:** Evaluate the environmental impact and location advantages of the business. This includes assessing the impact on the local environment, implementing sustainable practices, and ensuring that the chosen location aligns with the business's goals and target market.
- **Risk Assessment:** We will identify and assess potential risks, both internal and external, that could affect the business's success. This includes economic fluctuations, security concerns, and brand reputation risks

ASSUMPTION

Throughout the feasibility study for Omega Center for Special needs education, several key assumptions have been made to facilitate the analysis and planning process. These assumptions serve as a foundation for the study, guiding the evaluation of the business concept. It's important to acknowledge these assumptions to provide transparency and context for the study's findings:

Market Demand Assumptions:

- It is assumed that there is a demand for special education and therapy services in Rayyan, driven by the need to support individuals with diverse special needs.
- The population in Rayyan includes children and adults with various special needs, such as autism, learning disabilities, speech and language disorders, and more.

Economic Assumptions:

- It is assumed that Rayyan's economic environment remains stable, allowing for consistent funding and financial viability of the business.

Competitive Landscape Assumptions:

- Assumption that the legal and regulatory framework in Qatar, including licensing and special education laws, can be navigated effectively.

Location Assumptions:

- It is assumed that the chosen location in Rayyan is accessible, convenient, and complies with local zoning and regulatory requirements.
- Assumption that the community in the selected location is open to inclusivity and supportive of the center's mission.
- The community in Rayyan is culturally sensitive to the needs of individuals with special needs, and there is an increasing awareness of the importance of such services.

Sustainability Assumptions:

- It is assumed that sustainable and eco-friendly design practices will be an attractive feature to environmentally conscious customers.
- It is assumed that the business's sustainable practices will resonate with a growing segment of the market.

Cultural Sensitivity and Awareness:

- Assumption that Families and caregivers are actively engaged and supportive of enrolling individuals with special needs in the center.

These assumptions serve as a foundation for planning and decision-making, but it is crucial to regularly evaluate their validity and adjust business strategies as necessary to adapt to changing market conditions and customer preferences as Omega Center for Special needs education progresses.

FEASIBILITY STUDYS

ENVIRONMENTAL FEASIBILITY

The environmental feasibility of the Omega Center for Special needs education involves assessing the sustainability, involves an assessment of how the business will impact the environment and the measures taken to ensure its sustainability and compliance with environmental regulations. Considerations for environmental feasibility include:

Sustainable Practices: Omega Center for Special needs education aims to be a leader in sustainability. The business will incorporating sustainable design principles in the construction or renovation of the center. This may include the use of energy-efficient materials, natural lighting, and proper insulation to reduce energy consumption.

Environmental Education and Awareness: The business will incorporate environmental education into the special education curriculum, teaching students about sustainability and eco-friendly practices. encouraging environmentally responsible practices.

Local Regulations: Omega Center for Special needs education is committed to ensuring full compliance with all local and federal environmental regulations. We will stay informed about and comply with local environmental regulations, such as those related to air quality, water quality, waste management, and emissions.

LOCATION FEASIBILITY

Strategic Location: The location of Omega Center for Special needs education in Rayyan, Qatar has been strategically chosen for its proximity to major roads and public transportation is essential to ensure that clients can attend sessions regularly. Dubai is strategically positioned as a global hub, making it an ideal location for a Special Needs Education and One-on-One Therapy Center.

Safety and Security: Dubai's reputation for safety and security enhances the appeal of the location for families seeking specialized services.

Community Engagement: Rayyan, Qatar actively promotes community engagement and inclusivity. Partnering with local organizations, schools, and healthcare providers is highly feasible and can boost our outreach efforts.

Community Presence: Omega Center for Special needs education is identifying a location in a community known for its diversity and inclusivity can enhance the center's acceptance and integration within the local community.

TECHNICAL FEASIBILITY

Building and Facilities: The technical feasibility of this business largely depends on the suitability of the building and facilities in Rayyan, Qatar. We will ensure that the building meets the necessary structural and safety requirements for our service users. The renovation, interior layout, and design of the store should be technically feasible to create an appealing and functional space.

Qualified Staff: Recruiting and retaining qualified special education teachers, therapists, and support staff is a critical aspect of our technical feasibility. Rayyan offers a diverse talent pool and access to professional development opportunities.

State-of-the-Art Facilities: Leveraging the city's modern infrastructure, we can set up state-of-the-art facilities with cutting-edge equipment and resources to ensure the effective delivery of services.

Technology Integration: Qatar's strong technology infrastructure will enable us to integrate technology into our services, such as teletherapy options for remote clients.

Regulatory Compliance: Qatar has clear regulatory requirements for educational and therapeutic institutions, and our commitment to compliance ensures the technical feasibility of our operation.

ECONOMIC FEASIBILITY

Market Demand: The economic feasibility of our Special Needs Education and Therapy Center is underpinned by strong market demand. Dubai's growing population, increasing awareness of special needs, and the need for specialized services create a favorable economic environment.

Revenue Projections: Our detailed financial projections indicate a positive revenue outlook, considering client volume and pricing structures. A well-defined pricing strategy, taking into account affordability and value, ensures economic viability.

Financial Viability: While there are initial startup costs, careful financial planning and potential funding sources, such as grants, loans, and investors, enhance our economic feasibility. Dubai's position as a financial hub provides opportunities for securing funding.

Competitive Advantage: Dubai's competitive landscape presents the opportunity for us to differentiate ourselves through a diverse range of services, professional expertise, individualized programs, and strategic partnerships.

MARKET ANALYSIS

MARKET OVERVIEW

The UAE Education market size is estimated to grow at a CAGR of 5.55% between 2022 and 2027, and the size of the market is forecasted to increase by USD 817.5 million. The report includes historic market data from 2017 to 2021. It also extensively covers market segmentation by end-user (K-12 education and higher education) and ownership (private education and public education).

According to the World Health Organization, approximately 15% of the world lives with a disability. As of 2016, around 16,000 people with disabilities lived in the United Arab Emirates (UAE), with 62% being UAE nationals. The UAE is comprised of seven emirates, including Dubai, Abu Dhabi, Sharjah, Ajman, Ras al-Khaima, Al Fujairah, and Umm al Quwain, in order of population respectively.

In terms of meeting the needs of people with special needs, the UAE has made numerous advances. From the 1990's to the early 2000's, people with disabilities were left out of the community and lacked needed services. In 2006, Federal Law

No. 29 became the first law in the UAE to protect the rights of people with special needs. In terms of education, the law now allowed parents to enroll children with special needs in any school without exception. In 2008, the Ministry of Education (MOE) began a campaign for social integration with the slogan "School for All" and established the Department of Special Education. The National Project for Inclusion of People with Special Needs (2008) focused on environment, facilities, and equal opportunities in all areas of life. During the project, 15 public and private organizations participated, 50 students with special needs were enrolled in regular schools, 12 students with hearing impairments were sent abroad to complete their studies, and 20 people (including 7 women) with special needs found employment in various institutions. By the 2014-15 school years, 156 schools across the UAE executed the project.

The UAE federal budget of 2016 apportioned 21.2% to education with plans to hire accredited teachers, improve teacher Professional Development, develop smart learning programs, and overhaul the education curricula. In the 2016-17 school years, the UAE had 580 schools with 60% being private. Student enrollment was approximately 584,932. The UAE has a majority expatriate population with most families preferring international schools; even 58% of UAE nationals sent their children to private schools. As of 2016, Dubai is expected to increase private school enrollment by more than 126,401 students by 2020 and Abu Dhabi's private sector is predicted to rise by more than 40,000 students by 2021. With the expected student surge, an additional 52 private educational facilities are needed, which translates into more jobs for educators and administrators. In terms of rehabilitation centers for people with disabilities, approximately 2000 personnel worked across about 90 centers in 2016. When the math is broken down, that's about 22 personnel working in each center. Keeping in mind that some people and students with disabilities require one-on-one care, the demand for personnel to work in various rehabilitation and learning centers will definitely increase as new facilities arise.

MARKET SEGMENTATION

Market segmentation is one of the pivotal keys that would ensure optimal success for Omega Center for Special needs education. This is because the market segmentation defines the target market which therefore helps in creating compelling and positioning messages for our services.

By End-user, the market is classified into K-12 education and higher education. The market share growth by the K-12 education segment will be significant during the forecast period. Factors such as the fast growth of the economy, an increasing number of international migrants, and a surge in demand for quality English-medium education are contributing to this segment's growth. To stimulate the growth of the K-12 education segment during the forecast period, it is ensured by governments in Abu Dhabi, Dubai, Sharjah, and other emirates that any local children will be admitted to international schools free of charge. Primary and secondary schools in the UAE are using advanced digital technologies to enhance learning. Additionally, several initiatives have been undertaken to address the growing need to deploy advanced technologies in the K-12 system. For example, Alef Education, a private education technology company, provides technology-based education solutions at a school in Abu Dhabi. Hence, the increasing number of private schools offering high-quality education is expected to drive segment growth during the forecast period.

The education market in UAE is driven by the increasing focus on privatization in the education sector. Public educational institutions in the UAE follow the conventional curriculum, which has several gaps when compared to international curricula. Therefore, there has been a rise in enrollment in private institutions. The rising expatriate population is also leading to a surge of privatization in the education sector. The government of the UAE also supports the private sector through various policies. For instance, the National Strategy for Higher Education 2030 plans to achieve high scientific and professional education standards. A Private Sector Council will be set up to regulate the manpower

needs of businesses and specify qualifications to work in higher education. The plan also includes the Expanded Professional initiative, which aims to provide career training programs to students, including on-campus work, job shadowing, vocational training, and joint ventures. Hence, the significant contribution of private educational institutions is likely to boost the growth of the UAE education market during the forecast period.

The overall industry of special education for the disabled students in UAE, it is determined that there are approximately 200 special educational institutions. Most of the special education institution is established in Dubai. These institutions are providing education from the kindergarten to the professional level. The government has facilitated these educational institutions to increase their capacity and capability. Most of the institution is a nonprofit organization and facilitated by the aid of government as well as the local individual. United Nation and other higher level of the organization also provide financial support for the better future. These disabled schools have developed a special system for the student which helps them to get education and professional capability to be a great part of the society.

TARGET MARKET

it's essential to understand the local demographics and the specific needs of the community for Omega Center for Special needs education in Rayyan, Qatar. Here are the target groups:

Families with Special Needs Individuals: This group is the primary target for Omega Center. We will reach out to parents and caregivers of children and adults with special needs. Provide support, resources, and services that address their unique requirements.

Schools and Educational Institutions: Omega Center would collaborate with local schools, including public and private schools, to offer our services as an extension

of their educational support systems. Schools may refer students and partner with you to provide specialized education and therapy.

Healthcare Providers: Omega Center should look forward partnering with healthcare facilities, including hospitals, clinics, and rehabilitation centers. They can refer patients in need of therapy and related services to your center.

Government and NGOs: Establish connections with government organizations and non-governmental organizations (NGOs) focused on special needs support. They often have programs and initiatives that can complement your services.

Local Community Organizations: Joining hands with local community groups, support networks, and disability advocacy organizations. These groups can help Omega Center raise awareness and reach out to families in need.

MARKETING PLAN

MARKETING OBJECTIVES

Marketing objectives will cover the following broad objectives for Omega Center for Special needs education reach, operations, engagement, trust, and growth via the following measures:

- Build the center awareness across our target market
- Strategically align the Company with our partners
- Build the business equity thereby increasing sales
- Enhance customer relationships
- Increase profits and cashflows of the Company and ensure that a sustainable business model is built

MARKETING STRATEGIES

Omega Center for Special needs education aims to rapidly achieve awareness in Rayyan, Qatar, about its business in the first year, followed with awareness in the other city in future year across UAE.

Website – A well-optimized website with proper site structure, page layout, and clear and easy navigation that will be used for service description, partnerships and references. We will also create a reliable “About Us” Page among the top most popular pages of the website. The “About us” Page provides a personalized glimpse of Omega Center for Special needs education and its management team. It is a handy tool because people are curious; they will want to know those behind Home luxurious products and interior services.

Search Engine Optimization – Comprehensive Search Engine Optimization (SEO) programs will run on a scheduled basis to grow our customer base and expand our market exposure and reach. With SEO, our webpage will be optimized

organically; and within six months will result in first page appearances on Google, Bing, Yahoo and other search engines.

Social Media – Omega Center for Special needs education will continue to utilize social media marketing, to ensure the Company receives proper online exposure. Large focus put onto utilizing social media platforms as they will allow us to spread our business message to a broad audience for free. Facebook, Twitter, Instagram, LinkedIn, and Google+ are considered the most crucial social media channels to be in. In these four channels, there are many users, and there is no specific audience.

Email Newsletters - Regular email newsletters and blog posts serve as an outlet for communicating with our clients. It is vital not to over-email potential and existing customers, less frequent, but more useful information will be shared. The newsletter and blog posts will be informative, including industry news and company updates.

Word-of-Mouth – Omega Center for Special needs education will prioritize customer services and quality products while networking within the industry to develop additional customer contacts and strong word of mouth advertising to extend the Company name.

Direct Customer Marketing – Omega Center for Special needs education will target additional clients that can be served by our specialized equipment and expertise. We will hire a sales team to directed, which will conclude it through its market development prospects of customers who require freight transportation.

RISK ASSESSMENT & MITIGATION STRATEGIES

MARKET RISK

Market risks are external factors and conditions that can have a significant impact on the success of your Omega Center for special needs education and One-on-One Therapy Center in Rayyan, Qatar. Some market risks include:

- **Competitive Landscape:** The presence of established competitors or new entrants offering similar services can lead to a decrease in market share.
- **Economic Factors:** Economic fluctuations or recessions can impact the ability of clients to afford our services, leading to a decline in demand.
- **Regulatory Changes:** Changes in local regulations or licensing requirements can affect the operation of your center, leading to compliance challenges.
- **Market Size and Demand:** Variations in the number of individuals with special needs or the demand for specialized services can affect your client base.
- **Public Perception and Stigma:** Negative public perception or stigmas related to special needs can impact community outreach and acceptance of your services.

MITIGATION STRATEGIES:

- Invest in targeted marketing campaigns that emphasize your unique strengths and value proposition.
- Offer flexible payment options or scholarship programs for clients facing financial challenges.
- Maintain a financial reserve to ensure the business can withstand short-term financial challenges.

- Appoint a dedicated compliance officer to monitor and ensure adherence to evolving regulations and continuously review and update policies and procedures to align with the latest legal requirements.
- Leverage technology for remote therapy sessions to reach clients beyond your immediate geographical area.
- Encourage testimonials and success stories from clients to highlight the positive impact of your services.
- Conduct awareness campaigns to educate the community about special needs and the importance of early intervention and therapy.

Regular risk assessments and proactive risk management can help Omega Center navigate market challenges and make informed decisions for its projects in Rayyan.

FINANCIAL RISKS

Financial risks are significant considerations for Omega Center for special needs education. Understanding and managing these risks is essential for the financial health of the company achieving long-term success. Some financial risks include:

- **Cash Flow Risk:** Irregular client payments or delays in reimbursements from insurance providers can create cash flow challenges, impacting day-to-day operations and your ability to meet financial obligations.
- **Cost Overruns:** Unexpected or uncontrolled increases in operating expenses can strain your financial resources and affect profitability.
- **Bad Debt Risk:** Clients may face financial difficulties, causing them to default on their payment obligations or delay payments.
- **Staffing Costs:** High staff turnover or difficulties in retaining qualified personnel can result in increased recruitment and training costs.

MITIGATION STRATEGIES:

- Creation of accurate and up-to-date financial forecasts to anticipate cash flow gaps and plan accordingly.
- Implement efficient billing and payment collection processes, such as electronic invoicing and payment reminders.
- Develop a comprehensive budget that outlines all expenses and revenue projections, and regularly monitor actual expenses against the budget.
- Clearly communicate payment policies to clients and ensure they understand their obligations.
- Offer competitive salaries and benefits to attract and retain qualified staff.

An experienced financial team, a solid financial plan, and a proactive approach to financial risk management are crucial for Omega Center to navigate the financial challenges inherent in the special needs education industry.

OPERATIONAL RISKS

Operational risks in the Special needs education industry can affect the smooth and safe operation of Omega Center. Identifying and addressing these risks is vital for the company's operational stability. Some operational risks include:

Staffing Challenges: Difficulty in recruiting, retaining, or adequately training qualified staff can disrupt your operations and impact the quality of services.

Student-Centric Challenges: Meeting the diverse needs of students, each with their unique requirements, can be operationally complex and challenging.

Technology and Data Security: Reliance on technology for administrative tasks and remote therapy sessions exposes your business to potential data breaches and system failures.

Supply Chain Disruptions: Disruptions in the supply chain for specialized therapy equipment and materials can affect the continuity of therapy services.

Emergency Preparedness: Unforeseen emergencies, such as natural disasters or accidents, can disrupt operations and impact the safety of students and staff.

MITIGATION STRATEGIES:

- Implement a robust recruitment process to attract experienced special education teachers and therapists and create a supportive work environment with competitive compensation, benefits, and a focus on staff well-being to retain employees.
- Develop tailored educational and therapeutic programs for each student, considering their specific needs.
- Implement ongoing assessment and evaluation to adapt programs as needed.
- Invest in robust cybersecurity measures, including firewalls, encryption, and regular security audits to protect sensitive client information.
- Implement data backup and recovery procedures to minimize the impact of system failures.
- Work with multiple suppliers to minimize reliance on a single source and maintain adequate inventory levels of essential therapy materials to ensure continuity of care in case of supply disruptions.
- Develop a comprehensive emergency response plan that outlines procedures for different types of emergencies.

By addressing these operational risks proactively and developing robust risk management strategies, Omega Center can enhance operational efficiency, safety, and project success in the Special needs education sector.

RECOMMENDATION & CONCLUSION

RECOMMENDATION

Regulatory Compliance: Given the sensitivity of the services offered, ensure strict adherence to local regulations and licensing requirements. Appoint a dedicated compliance officer to monitor and adapt to evolving regulations.

Market Differentiation: Emphasize your center's unique strengths, such as a diverse range of specialized programs and highly qualified staff. Use targeted marketing campaigns to highlight these advantages.

Diversified Funding: Reduce dependence on a limited number of funding sources by exploring various avenues, including grants, scholarships, and corporate sponsorships.

Community Engagement: Continue to foster strong relationships with local schools, healthcare providers, and support networks to extend your client base and create a supportive ecosystem.

Client Communication: Implement efficient communication channels with clients, especially regarding appointment reminders and cancellation policies to reduce no-shows and cancellations.

CONCLUSION

The feasibility study demonstrates the opening Omega Center in Rayyan, Qatar, is indeed feasible. By strategically focusing on the recommendations and understanding the unique market dynamics of Rayyan, the business can thrive and become a successful business.

In conclusion, the feasibility study for establishing a Special Needs Education and One-on-One Therapy Center in Rayyan, Qatar, reveals that this venture holds strong potential for success. The local community's diverse needs and the city's

accessible location provide a favorable environment. By addressing operational, financial, and market risks through strategic planning and diligent execution, the center can offer high-quality services and make a meaningful impact on the lives of individuals with special needs.

To achieve long-term success, the business should focus on regulatory compliance, market differentiation, diversified funding, technology security, and community engagement. These recommendations will contribute to the sustainability, growth, and positive social impact of the center. With a dedicated team and a commitment to excellence, the Special Needs Education and One-on-One Therapy Center in Al Rayyan has the potential to become a valuable resource for the community and a beacon of hope for individuals with special needs.

	Year 1	Year 2	Year 3	Year 4	Year 5
	AED	AED	AED	AED	AED
Sales					
Total Sales	1,500,000	2,000,000	2,500,000	3,000,000	3,500,000
Total Cost of Sales	0	0	0	0	0
Gross Margin	1,500,000	2,000,000	2,500,000	3,000,000	3,500,000
Gross Margin %	100%	100%	100%	100%	100%
Operating Expenses					
Rent	360,000	360,000	360,000	360,000	360,000
Vehicle rental	120,000	120,000	120,000	120,000	120,000
Miscellaneous	120,000	138,000	158,700	182,505	209,881
Salary	600,000	690,000	793,500	912,525	1,049,404

Total Operating Expenses	1,200,000	1,308,000	1,432,200	1,575,030	1,739,285
Operating Income	300,000	692,000	1,067,800	1,424,970	1,760,716
Operating Margin	20%	35%	43%	47%	50%
EBITDA	300,000	692,000	1,067,800	1,424,970	1,760,716
Depreciation and Amortization	2,000	2,000	2,000	2,000	2,000
Interest Expense	0	0	0	0	0
Tax Incurred	15,000	34,600	53,390	71,249	88,036
Net Profit	AED 283,000	AED 655,400	AED 1,012,410	AED 1,351,722	AED 1,670,680
Net Profit/Sales %	19%	33%	40%	45%	48%

From the above analysis, it is projected that the business will have a total revenue of **AED1,500,000** in the first year of business activities. Every business always aspires to increase its sales. With the sales marketing strategy adopted, it is assumed that this will yield an increase in the subsequent years of business operations, thereby, causing the revenue for each year to increase too.

The volume of revenue influences the profit that will be made during the year, therefore revenue generated in the course of running the business results in an increase in profit made by the business after taking care of all expenses.

BREAK-EVEN ANALYSIS

Break-even is the point where the business neither makes profit nor loss. This means that at break-even, the business is only able to pay up its expenses both fixed and variable cost without any excess. The essence of break-even is to determine the number of sales that could lead to profitability

Break Even Analysis					
	Year 1	Year 2	Year 3	Year 4	Year 5
Fixed cost	AED 1,200,000	AED 1,308,000	AED 1,432,200	AED 1,575,030	AED 1,739,285
Variable Cost %	0%	0%	0%	0%	0%
Gross Margin %	100%	100%	100%	100%	100%
Break Even Income	AED 1,200,000	AED 1,308,000	AED 1,432,200	AED 1,575,030	AED 1,739,285
Revenue	AED 1,500,000	AED 2,000,000	AED 2,500,000	AED 3,000,000	AED 3,500,000

The business is seen to break the even in the first year of business activities. This means that there must be more than **AED1, 200,000** worth of sales yearly before any profit can be recorded. The above analysis can be seen in the below graph showing the breakeven income and revenue.
